JOB CODE 864
PAY GRADE 10
PAY RANGE: \$10.62 - \$15.97
ENTOMOLOGICAL INSPECTOR I

MAJOR FUNCTION: Technical work involving field inspections to locate, enumerate and control, mosquitoes and other nuisance arthropods.

KNOWLEDGE, ABILITIES AND SKILLS NEEDED IN ORDER TO PERFORM THE ESSENTIAL JOB FUNCTIONS:

Knowledge: Knowledge of mosquito biology and behavior. Knowledge of equipment and procedures used in an Integrated Pest Management (IPM) mosquito control program. Knowledge of Federal, State and Local laws governing mosquito control and pesticide applications and storage. Knowledge of rules of safe operation and handling of pesticides and equipment utilized for inspection, ground ULV application (fogging), and ground larviciding. Knowledge of the standard equipment, tools, techniques and procedures used in mosquito and arthropod control.

Abilities: Ability to implement mosquito and other nuisance arthropod population abundance surveys through standard collection, enumeration and identification techniques. Ability to keep numeric records, and maintain records which are readily available, systematic and meaningful. Ability to understand and interpret the surveillance results. Ability to work with computers. Ability to understand and follow oral and written instructions. Must be able to work without direct supervision and be able to make decisions on correct use of pesticides in the field. Ability to understand and follow oral and written instructions. Good physical condition. Ability to maintain an effective working relationship with the public and other employees. Ability to have sufficient physical strength and agility and freedom from disabling defects to perform manual labor (occasionally under adverse weather conditions). May perform other related work as needed or required.

ESSENTIAL JOB FUNCTION: Makes systematic checks of larval and adult populations of nuisance arthropods by operating and collecting nuisance arthropod population information by using various trapping methods, such as; light traps, suction traps, truck traps, CDC traps, oviposition cups, resting boxes, and emergence traps. Makes landing rate counts, reads thermometers, rain gauges, water level instruments, etc.. Capable of keeping accurate, computerized records. Creates good public relations through accurate and polite explanations of mosquito-related problems to residents. Applies insecticides safely, following label instructions. Responsible for the placement of fish, predatory mosquitoes and other biological control agents at specific sites, and monitoring of the efficacy of treatments. Responsible for periodic investigation of numerous private sewage and waste water facilities, and monitors mosquito production and institutes corrective action through operator contact, or regulatory intervention, where necessary. Develops proficiency in identifying and enumerating adult mosquitoes. Participate in training concerning county, state and federal safety regulations; including OSHA, the MSDS program, vehicle safety and equipment safety. Performs related work as required.

ESSENTIAL PHYSICAL SKILLS: Physical strength and agility sufficient to perform inspection tasks under varying weather conditions and work exceptional hours during an emergency. Constant walking, standing, use of both hands and fingers, very frequent light lifting (30 lbs. or less), frequent heavy lifting (30+ lbs). Very frequent light carrying (30lbs or less), reaching above the shoulders, kneeling, sitting, bending and squatting. Good hand/ eye coordination and near and far vision. Good hearing.

ENVIRONMENTAL CONDITION REQUIREMENTS: Indoor duties are required for using a microscope, data processing and analysis, scheduling and various meetings. Frequent work outside under adverse weather conditions of cold, heat, humidity, rain, lightning, and perform duties in and around saltwater, etc..

WORK HAZARDS: Outside work is often in harsh environments such as swamps, ditch banks, orange groves, being subjected to long periods of high sunlight and high temperatures, and where mosquitoes, sandflies and other nuisance arthropods are abundant. Handling of pesticides and other chemicals is required and involves potential physical reactions per label and MSDS statements. Other hazards encountered may include snakes (some poisonous), spiders, wasps, ants, bees and toxic plants (poison ivy, etc.), which occur in natural environments. Physical work may include heavy lifting of over 30 lbs. Field inspections often includes penetrating dense vegetation, wading through mud and water, traveling on foot over uneven terrain with more or less hidden dangers of obscured stumps, or trees, or sticks, and often unseen holes and depressions. Normal hazards involved in use of electrically operated traps, use of chain saws and other power tools.

SAFETY EQUIPMENT USED OR NEEDED: MSDS, Chemical Hygiene Plan, Chemical Spill Procedures Manual, helmet, gloves, goggles, wetsuit, respirators, earplugs, boots, dive boots, lifting belts, chaps and appropriate clothing protection.

EDUCATION: Graduation from an accredited high school or possession of an acceptable equivalency diploma. A comparable amount of training or experience may be substituted for the minimum qualifications.

EXPERIENCE: No special experience needed.

LICENSE, CERTIFICATION OR REGISTRATION: Must have a Florida Public Health Pest Control license and possess a valid Florida drivers license (CDL, class A, B, C, or D) and maintain a good driving record.
